# FINAL ANNOUNCEMENT

## 75TH CONTINUING ORTHOPAEDIC EDUCATION OF INDONESIAN ORTHOPAEDIC ASSOCIATION

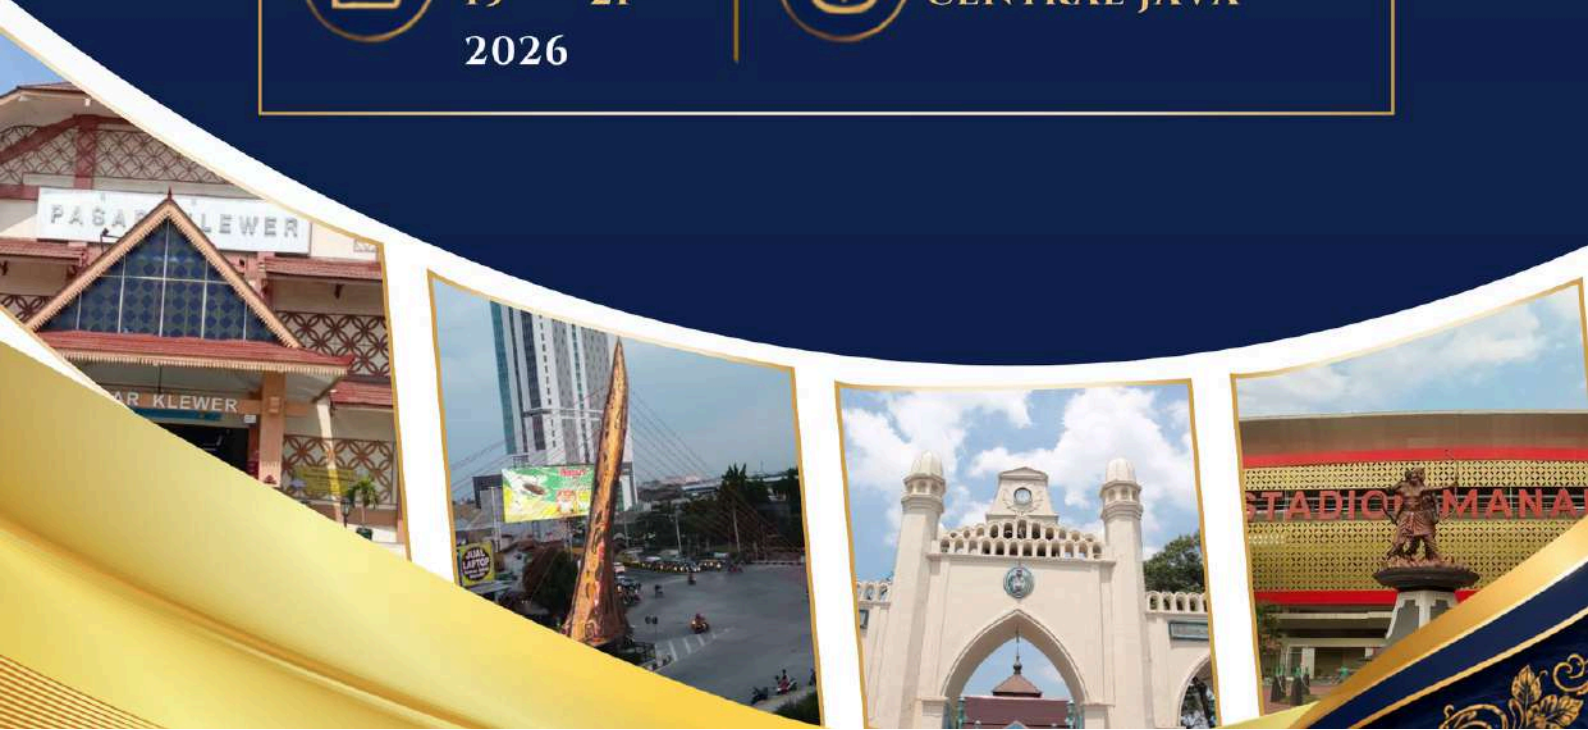

THEME

**FIGHTING AGAINST DEGENERATION IN ORTHOPAEDICS**

FROM BASIC SCIENCE TO SOPHISTICATED INNOVATIONS

NOVEMBER 19TH – 21ST 2026

ALILA SOLO HOTEL, CENTRAL JAVA

# GREETINGS

## *IOA President*

Dear Colleagues,

On behalf of the Indonesian Orthopaedic Association (IOA), we are delighted to announce the 75th Continuing Orthopaedic Education (COE) of the Indonesian Orthopaedic Association (IOA) to be held on November 19th - 21st, 2026 at Alila Solo Hotel, Solo, Central Java.

The theme is "Fighting Against Degeneration in Orthopaedics: From Basic Science to Sophisticated Innovations". The scientific program of COE 2026 will feature keynote lectures, focused sessions, interactive discussions, and presentations showcasing current research, clinical practice, and technological developments.

It is a pleasure to welcome you to Solo, commonly known as Surakarta, a city in Central Java, Indonesia. It is a center for traditional Javanese arts and royal heritage. Alongside the scientific sessions, participants will also have the opportunity to experience Solo's rich cultural heritage and to build meaningful professional and social connections.

We warmly invite you to be part of this meeting and look forward to welcoming you to the 75th COE of IOA in Solo.

Yours sincerely,

**Bintang Soetjahjo, Dr., dr., Sp.OT.Subsp.P.L(K)**
*President of theIndonesian Orthopaedic Association (IOA)*

# GREETINGS

## *Chairman of IOA Central Java*

Dear Honorable Professors, Colleagues, and Participants

On behalf of the Organizing Committee, it is my great pleasure to welcome you to the 75th **Continuing Orthopaedic Education**, organized by the **Central Java Chapter of the Indonesian Orthopaedic Association (PABOI)** in the historic city of Surakarta.

The theme of this COE, **"Fighting Against Degeneration in Orthopaedics: From Basic Science to Sophisticated Innovations"** highlights some of the most significant challenges in contemporary orthopaedic practice. As populations continue to age and life expectancy increases, degenerative musculoskeletal disorders have become a major cause of pain, disability, and reduced quality of life. At the same time, remarkable advances in diagnostics, surgical techniques, biologic therapies, regenerative medicine, and rehabilitation continue to transform the management of these conditions.

This event is designed to provide a scientific forum where orthopaedic surgeons, healthcare professionals, researchers, and trainees can exchange knowledge, discuss emerging evidence, and share clinical experiences. We hope that the scientific sessions will stimulate meaningful discussions, encourage multidisciplinary collaboration, and promote evidence-based practices that ultimately improve patient care.

Through this meeting, we aim not only to disseminate the latest scientific knowledge but also to strengthen professional networks and inspire future collaborations among colleagues from across Indonesia.

I wish you a rewarding scientific experience and an enjoyable stay in Surakarta. May this COE inspire new ideas, strengthen professional friendships, and contribute to the continued advancement of orthopaedic care in Indonesia.
I look forward to welcoming you to Surakarta for an inspiring and unforgettable event.

Yours sincerely,

**Mujaddid Idulhaq, Dr., dr., Sp.O.T.Subsp.Onk.Orth.R(K), M.Kes**
